PHYSICAL DESCRIPTION

Unit B: 0-483 cm
 Dark grey, faintly laminated, clayey silt unit.
 Lamination is very faintly defined throughout most of unit
 - some relatively well-defined beds with reddish color @ 110-160 cm
 - some beds defined by grain size variation @ 210-280 cm and 0-125 cm.
 Bioturbation masks bedding somewhat, although there are few well-defined burrows.
 No shells and no significant deformation.

0-483 cm ML
